

TECHNICAL INFORMATION

HAND SINK SYSTEM WITH ELECTRONIC FAUCET AND SOAP DISPENSER

DST 304

Safety is of primary importance in the preparation room. At the cleanup station, it is essential to minimize crosscontamination. DST offers instrument and hand sinks that meet OSHA requirements. Sinks require use of tempered water supplied by a thermostatic mixing valve.

FEATURES

High quality 18-gauge stainless steel sink

Heavy-duty double-cap strainer

Hands-free operation via electronic motion sensor for faucet and soap dispenser

Sink Dimensions: Length 19" Width 18" Depth 7.25"

AUXILIARY REQUIREMENTS

Tempered water to be supplied by DST 429 Sink System Mixing Valve

4 "C" cell batteries for faucet (included)

4 "D" cell batteries for soap dispenser (included)
